

SAVE OUR LAKES

APRIL 2024 Volume 24, Issue 4

BLACK CREEK INLET FACILITY: The steel sheets separating the creek from the inlet facility construction have been removed. The inlet grates, seen in last month's newsletter, are completely covered indicating that at this level, there is sufficient water in the creek for pumping to take place.

PUMP STATION: The foundations are complete and the stem wall formwork has been stripped away. Workers are installing the below floor slab equipment and conduits. They are keeping ahead of the fill dirt being installed in lifts and compacted before the reinforcing steel is placed and the slab poured. The discharge pipes will come out this side of the pump station.

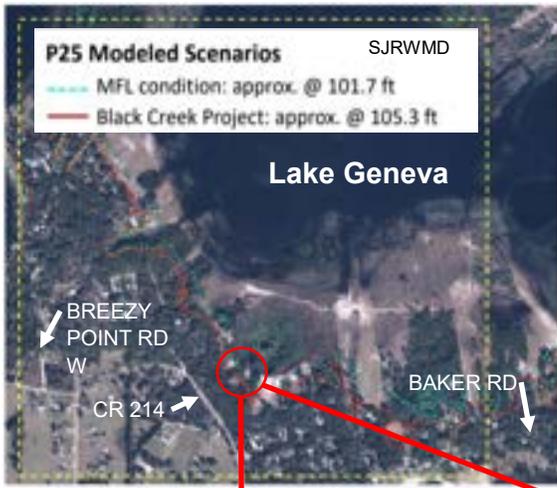

SAVE OUR LAKES ORGANIZATION, INC.

EMAIL: save-our-lakes@comcast.net - **WEBPAGE:** www.saveourlakes.org

President: Vivian James — **Vice President:** Chandler Rozear — **Secretary/Treasurer:** Susan Welsh

Board Members: Webb Farber, Glenda Harper, Scott Slater, Dr. Pat Welsh

THE GENEVA PROJECT: A number of years ago, the District surveyed the existing Lake Geneva docks, noting the elevations of their decks and of the ground at the water most pier. The District's Lake Level Modeling, when projected to an existing dock and nearby high water mark give us cause for excitement at getting our lake back and concern for the enormous change to our lake's shoreline and bottom. It's coming. Are we willing to get the trees out while we can?

SOLO WEBSITE www.saveourlakes.org

You can get information as well as communicate with us through our website: www.saveourlakes.org or our email: save-our-lakes@comcast.net. Our newsletter comes out once a month by email and US Mail (usually the first week of the month).

Please feel free to check us out!

SJRWMD GOVERNING BOARD Mtg. 10:00 AM TUESDAY, 4/9/2024 at the Palatka Office
Verify on website: www.sjrwmd.com/governingboard/ (Live Streaming is available)

TREATMENT AREA: Beginning with sub-surface piping, a concrete water tank 60ft in diameter has begun construction at the Treatment Area site. This tank will receive the water from the pipeline, holding it so it can be distributed to the treatment ponds at the rates required to provide finished water equal in quality to that existing in Lake Brooklyn.

03/27/2024 DATA (Elevations NAVD88)

Brooklyn Level: 109.6 Ft
Alligator Creek Flow: 8.9 MGD; Level: 110.1 Ft
Geneva Level: N/A
South Fork Black Creek (SR-16) Flow: 33.9 MGD; Level: 9.94 Ft
Monthly Rainfall: 2.4" (Source: SJRWMD and USGS)
