

SAVE OUR LAKES

MAY 2022 Volume 22, Issue 5

KEYSTONE BEACH IS COMING TO LIFE

Keystone Beach on Lake Geneva was the site of first MOTOSURF Continental Cup Races of their 2022 season. Events were held for both gasoline and electric powered boards with men's, women's, hobby and pro classes racing on the water. Electric powered skate boards were raced in the parking lot. Held April 22-24, the event was recorded for a future network television broadcast.

4. The new concrete stage with the roof and railings patterned after those on the Keystone Beach Pavilion became a place for both T-shirt sales and professional mechanical assistance.

5. The JETSURF Boards are made in Czechoslovakia. One of their mechanics talks with a member of a team from Mexico. Lk. Geneva gets International notice.

The City of Keystone Heights and Chemours held a **KEYSTONE BEACH CLEAN UP DAY**. With events soon to be held at the beach and the Pavilion, the volunteers helped both of them to look their best. These photos are screenshots taken from the City's Facebook page.

BLACK CREEK WATER RESOURCE PROJECT UPDATE: The State of Florida Department of Environmental Protection (DEP) has issued an Environmental Resource Permit (ERP) to the St Johns River Water Management District for the construction and operation of the Black Creek Water Resource Development Project! The Notice of Intent to issue the ERP was received on March 11st and was published on March 17th. After the mandatory 14 day waiting period following the publication of the Notice of Intent where no one challenged the permit, the DEP issued the ERP on April 1st. The Army Corps of Engineers (USACE) was copied on DEP's distribution of the ERP and is expected to issue the 404 Permit, which addresses wetlands and water quality certifications, in April.

The District is well underway in discussions with their design and construction management services consultants with procurements of construction related work expected to go before the Governing Board for consideration during the May to July time period. This will include Construction Management Services and the Award of the construction of the Intake Structure and Pump Station near Black Creek. It should start construction in August. The bidding for the Intake Structure and Pump Station is planned to be advertised on May 5th.

1. Outfall Geneva West Lobes
 2. Eroded stream in cleared area between the Lobes and Main Lake
 3. Discharge into main lake
 Note: All the trees between the lobes and main lake will come to look like these trees.
